Oct.27, 2023 - Germany - 40 year old Marc Dippold, died suddenly on Oct.27, 2023.

SG in shock: Marc Dippold has died

Sad news for all soccer players in the Play circle. The longtime Ramsenthal player Marc Dippold, who is in the took responsibility as a trainer in recent years, is only at the age of 40 Years passed away. The sympathy of the football community goes to his relatives and friends.

From Hans-Jürgen Wunder

For Marc Dippold, club loyalty still counted something. The Ramsenthaler spent his football life in the Bindlach district, was able to celebrate the flight up to the district league and was also there as it went back to the A-Class. And not only that. In difficult times with double descent he agreed to keep the troops together. As a player coach, in a responsible position. And his work was fruitful. Already in the last season the Ramsenthalers were listening, under his direction almost sniffed on the climb. The long-time captain had only jumped into breach when Ronny Hofmann once had to stop. But the embarrassment solution was an ideal constellation become. So it made sense that Marc Dippold continued, as the Lack of staff due to a syndicate with the Bindlacher was worked. He has been with the A-class team since the beginning of this season with whom he had ambitious goals. He also worked with the Bindlacher Coach Fatos Haziri very trustingly together. .

Darmstadt football circle mourns Christian Reibold

The footballers in the Darmstadt district were very dismayed to have noticed Christian Reibold's death. Christian Reibold, most recently hired as a B-Junior trainer at Hassia Dieburg, has left many traces in the circle. Growing up at his regular club TSV Nieder-Ramstadt, he rose to the district league A Darmstadt exactly 10 years ago as a coach with Hellas Darmstadt. The Reibold, who worked as a teacher at the Rehberg School in Roßdorf, was also involved at SG Modau.

At the age of only 38, Christian Reibold died as suddenly as unexpectedly. Our deep sympathy goes to his wife, the six children and all family members. The Darmstadt football district will keep the deceased an honorable memory.

EXCLUSIVE: Footballer who collapsed with cardiac arrest is saved by opposition player

Jack Hurley was saved by having a defibrillator nearby, and now he is calling on the Government to scrap VAT on the devices so more can be installed in public places

My Take...

As I've watched soccer players continue to collapse over the past 5 months, I've thought to myself: "no one is going to care", "it's old news". Soccer players have been collapsing since 2021.

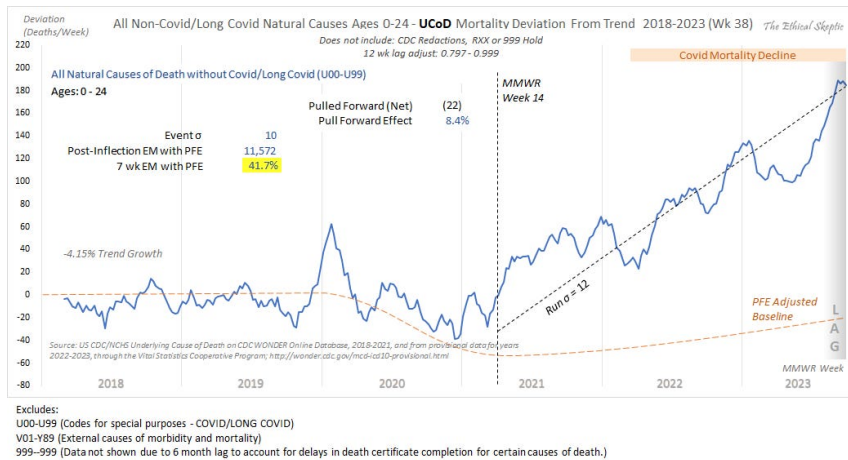

However, the world just watched 28 year old Raphael Dwamena die on the soccer field yesterday, November 11, 2023.

Consider this:

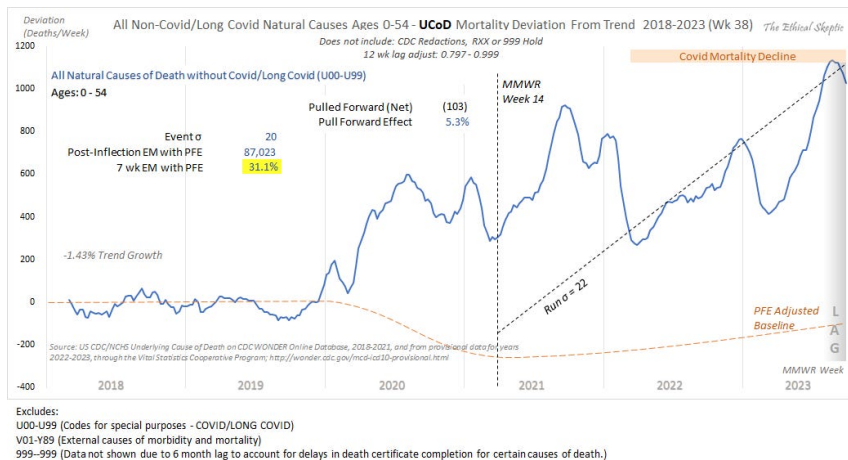

There are at least as many soccer players dying suddenly NOW with COVID-19 vaccine booster uptake of 5-10% & 3 years after the rollout of COVID-19 vaccines, as there were

when 85% of the population were lining up for their first two COVID-19 jabs.

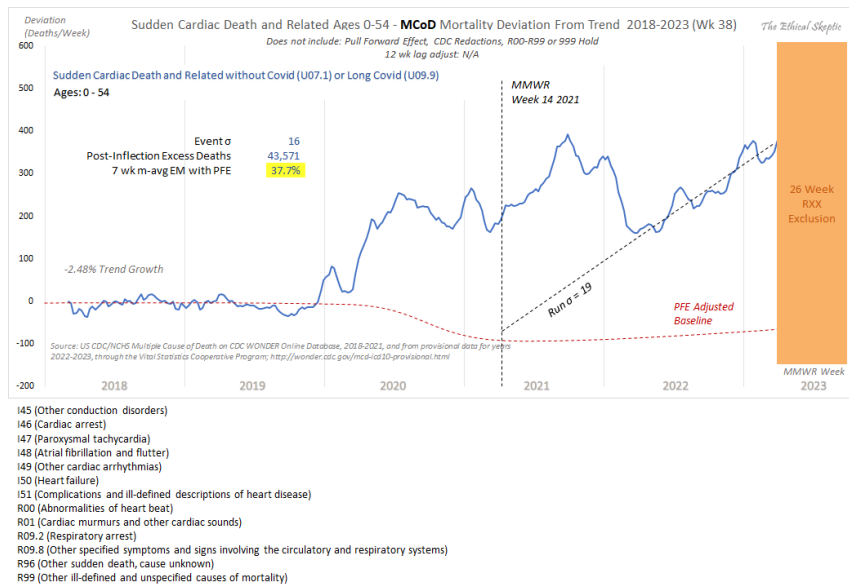

All Natural Causes of death 0-24 years old: this group is getting hit the hardest (source: Ethical Skeptic)

All Natural Causes of death 0-54 years old: not as dramatic when factoring in the 25-54 year olds but still at a record high

Sudden Cardiac Death Ages 0-54: at or near record high

Summary:

Out of 46 soccer players who died suddenly since June 2023:

- 12 died while playing soccer (7 during a game, 5 while training)
- 8 died of cardiac arrest or heart attack (at least)
- 3 died in their sleep
- 3 died from Turbo cancer
- 2 died from pulmonary embolism (1 died during a flight)
- 1 died from stroke
- 1 died from infection

The only reasonable explanation: this is a snapshot of LONG TERM COVID-19 mRNA Vaccine Induced Injury.

This is a very bad sign. Thousands of young people are walking time-bombs for collapse and sudden death.

Setting aside the non-cardiac mRNA Vaccine injuries for a moment:

1. We don't understand the underlying mechanisms of long term cardiac damage from COVID-19 mRNA Vaccines
2. We have no idea what the long term prognosis is

3. We have no screening programs in place for young athletes
4. We have no diagnostic tools in place for young athletes
5. Cardiologists have no treatment options to offer to mRNA injured young athletes, whether they're symptomatic or asymptomatic

In summary, we have no idea of the **extent of cardiac injury that has been inflicted on young people via the reckless and malicious rollout of COVID-19 mRNA Vaccines and Vaccine Mandates.**

This only means more and more deaths in the foreseeable future.

Soccer players are the canary in the coal mine.
